CAMP OF HAHN IS

Lambi Union and Elizabeth Mines to Be the Principal Ore Products for The Reduction Plant.

Idaho is soon to have another smelter which will be able to handle 300 tons of ore a day. The Lemhi Smelting company is building a plant on its property in the Spring Mountain mining district, near the Montana line. It is situated at the head of Birch creek and the Lemhi river, on the western side of the divide. The district is generally known ts the "Sheep Mountain country" and is about 175 miles north-east of Boise. The principal town in the camp is Hahn, named after one of

the directors of the company.

"We are now building at Hahn a smelter with a 300-ton daily capacity," said H. L. Fisher, president of the company, yesterday. "This year we have erected one stack and next spring we will raise two others. Our Blake will raise two others. Our Blake rock crusher is sufficiently large to crush the rock for a 300-ton plant.

"During the construction work now in progress only 75 men are employed but the force will be increased early in the year. We have ordered our own sawmill, which will soon be installed and will cut our own lumber for the finishing of the mill, bunk houses, as-say and general office buildings and blacksmath shop and then have lumber. blacksmath shop and then have lumber to spare for the cabins of men with families who are already in camp. There is already in the town of Hahn a hotel, butcher shop, general store, blacksmith shop and livery stable.

"We look for a large increase in population early in the spring. The roads are now in first class condition, for automobiles as well as stages. The company owns its own auto and Beggs has just completed an auto line between Boise and Hahn, 75 miles, and his first machine has just arrived, which is capable of carrying eight passengers and the driver. He will have sengers and the driver. He will have two more machines early in the spring Autos are cheaper than horses.

installed. As soon as the building is inclosed they will start work on the new furnaces, delaying this in order that they may not be stopped by the cold weather.

"A pipe line, two miles long, buried two feet under ground, now brings all the water for the town as well as for the use of the smelter itself. "At present the company is constructing two transways, one from the Lemhi Union group, and the other from the Elizabeth, the two principal mines in the camp. Each of these trams is about 3,000 feet long and is swung without intervening towers. These trams will bring the ore from the mines to the bins on the wagon road, about a mile and a half from the smelter, which saves much expense. In the spring the company will build another tram from the smelter to the wagon road station bins, which will be operated by steam, reducing the cost to the minimum.

The ore of this camp is lead and silver and runs upward from 35 per cent in lead and 30 ounces in silver to the top and carries a few dollars in gold.

CHICAGO.

Chicago, Dec. 28.—The wheat market opened quiet but steady to strong today owing to an advance of 3d to 3d at Liverpool, initial quotations being a shade to 3d higher than the previous close. The firmness at Liverpool was due mainly to the smallness of world's shipments for the week, the total movement being 6,08,000 bushels to compared with 8,08,000 bushels the corresponding week I vear ago. CHICAGO.

ment being 5,035,000 bushels compared with 8,038,000 bushels the corresponding week a year ago.

Strength of wheat and a scarcity of offerings caused moderate firmness in the corn market. May opened unchanged to ½ higher at 00.15 to 61. Later May sold up to 61½.

Outs were extremely dull but firm tone owing to good demand by cash houses. At the opening prices were ½ to % higher with May at 52. Later May sold at 51%,051%.

Provisions were strong on light receipts of live hogs at all western packing centers. Prices at the opening were up 7½ to 30 with pork showing the greatest advance.
